

Weekly Covid Update

Stephens Memorial Hospital will be providing a comprehensive weekly update regarding the Covid-19 situation in our community.

1. We did not receive any vaccines the week of January 25th. You can visit www.smhtx.com to access a link to a map that lists facilities with vaccine availability. We strongly suggest calling the facility to see if an appointment is necessary. Some people have been able to get their vaccine at various pharmacies including Brookshires in Eastland and United in Graham. None of the pharmacies here in Breckenridge have received any doses yet.
2. Citizens will need to go to our website, www.smhtx.com, and fill out the form to be placed on the waiting list if they want to wait to receive the vaccine here at Stephens Memorial. We will be distributing vaccines based on the CDC's playbook. Once we receive vaccine we will call and let those signed up know when and where to go.
3. Last week we saw a significant decrease in positive cases in our community. Let's hope that trend continues in to this week.
4. Stephens Memorial Hospital has received an allotment of the drug, Bamlanivimab, which will help in the treatment of Covid patients. Bamlanivimab is available to be used on an out-patient basis and requires an order from your Physician.
5. If you wish to be added to the email distribution to receive this weekly update you can call 254-559-2241 ext. 1705 or email chris.curtis@smhtx.com
